Q. Create a REST API for a *book* based on the structure below:

```
{
    bookName: "...",
    price: 123,
    ISBN: "...",
    authorName: "...",
    publisherName: "..."
    publishedDate: "...",
    edition: "..."

}
```

After creating the REST API, host the server/application on Heroku.

Marking Scheme

[Hosted on Heroku: 4, Correct Code Execution: 6, Correct Approach: 3, Code Readability: 2]
